

Forensic Consulting Group Begins Operating as Verity Experts and Engineers**Mobile, Ala. —**

Forensic Consulting Group (FCG), an emerging engineering firm, announced today that the company will begin operating under the name Verity Experts and Engineers, effective immediately. This strategic decision helps differentiate the company from other firms while reflecting the values of the company and its team.

Verity is a forensic engineering firm that specializes in structural and civil engineering investigations and litigation support. Formed in 2013, the company serves the insurance and litigation communities by meeting their investigative and engineering needs. Verity Experts and Engineers provides evaluations and engineering reporting in cases involving hail and wind damage, flood damage, water intrusion, construction defects, blasting and vibration, and building code compliance, among other services. The organization's roster is composed of highly skilled engineers which allows for operation in over 30 states including the District of Columbia.

Verity's President and Principal Engineer, Gregory L. Boso, is enthusiastic about the name change, saying, "The definition of verity is the state or quality of being true; accordance with fact or reality—which speaks volumes as to the services we provide through our forensic engineering investigations and litigation support. We're hoping a name like Verity Experts and Engineers will shed some light on what it is that we practice and our commitment to presenting the truth."
